Slide title

$$\Gamma = \frac{1}{\Lambda}$$

你好多戈！ This template includes a light and a dark theme, as well as an option to remove the UoY logo from the background. Options:

uoybglogo To place a watermark version of the University of York logo in the background

darktheme To enable the dark theme

So for having a dark theme and the logo in the background, you'd load the style with

```
\usepackage[uoybglogo,darktheme]{uoy-beamer}
```

Slide title

You may need to add some space after the frame title

```
\setlength{\frametitlemargin}{10mm}
```

Slide title

You may need to add some space after the frame title

```
\setlength{\frametitlemargin}{10mm}
```

Using an empty frametitle or not using it, you will need to add initial space by yourself. To have an “empty” frametitle you can use

```
\emptyframetitle
```

Slide title

You may need to add some space after the frame title

```
\setlength{\frametitlemargin}{10mm}
```

Using an empty frametitle or not using it, you will need to add initial space by yourself. To have an “empty” frametitle you can use

```
\emptyframetitle
```

or (more portable)

```
\frametitle{\strut}
```

If you do not want any titles in a frame, you can use

`\noframetitle`

Using

`\noframetitle[0mm]`

As above, you may want to use the same command with a length to specify where (vertically) the text should begin.

Single title

If you need just a simple title you can use

```
\framesingletitle{your title}
```

You may want to use the same command with a length to specify where (vertically) the title should begin.

```
\framesingletitle[0mm]{your title}
```

Blocks

Additional blocks

- termblock
- problock
- conblock
- yellowblock
- blueblock

Transparency of blocks may not look very nice on dark backgrounds, to disable it:

```
\setblockbodyopacity{1}
```

Additional blocks

This is an example of a very long title that needs to be split in two lines (no longer than 2 lines are visually comfortable)

Bla bla bla...
